EDUCATION

GRT Institute of Engineering and Technology

Bachelor of Computer Science with Honors in Cybersecurity , **CGPA:8.5**

Tiruttani, India

2022 – 2026

EXPERIENCE

Java Full Stack Developer

Mar 2026 – Present

AccioJob

Chennai

- Built a strong foundation in Data Structures and Algorithms using Java.
- Developed full-stack web applications using Spring Boot, REST APIs, React, HTML, CSS, and JavaScript.
- Worked on backend development, database integration, and multiple hands-on full-stack projects.

Software Development Engineer Intern

Sep 2025 – Feb 2026

NameKart

Chennai

- Contributed to open-source code-base maintained by NameKart to enhance automation and data processing workflows.
- Collaborated with the development team to design and improve backend features using Python (Flask) and MongoDB.
- Implemented and optimized code modules for AI-driven lead processing and data extraction systems.

PROJECTS

HulyPay – Smart Fintech App

Sep 2026

Flutter, Dart, Supabase, SQLite, Antigravity, SpringBoot

- Engineered a cross-platform fintech application featuring QR code payments and interactive visual spending analytics.
- Implemented an offline-first architecture with SQLite caching and Supabase synchronization for reliable transaction logging.
- Integrated real-time camera QR scanning with fallback decoding, improving merchant checkout and payment throughput.

Customer Relationship Manager (CRM)

Jun 2026

Spring MVC, Hibernate, MySQL, HTML, CSS

- Built a web-based CRM application implementing CRUD operations for efficient customer management.
- Developed the application using Spring MVC, Hibernate (ORM), and MySQL with DAO architecture.
- Integrated the frontend with the backend to manage customer records through a responsive HTML/CSS interface.

Decentralized Health Management System

Aug 2026

Python, Flask, Blockchain, n8n, Arduino

- Integrated n8n to automate WhatsApp alerts, enabling real-time communication between the system and caregivers.
- Achieved 80% real-time data accuracy in vital parameters(temperature, spO2) with automated blockchain data storage.
- Reduced data tampering risk by 100% and improved emergency response to user by friendly applications like whatsapp.

SKILLS

Languages: Java, Python, JavaScript

Web Dev: React, HTML, CSS, Node.js, Flask, Express, Spring Boot

Databases: MySQL, MongoDB, Redis

Cloud/DevOps: AWS, Docker

Tools: Git, GitHub, VS Code

Design: Figma, Canva

CERTIFICATIONS

AWS Cloud Practitioner

Python (GUVI)

Java (Coursera)

Computer Networks (NPTEL)

Google Cloud Study Jams

Java FullStack(AccioJob)

COMPETITIVE PROGRAMMING

- Solved 500+ DSA in Leet code and 600+ DSA in AccioJob coding platforms with proficiency in Java and algorithms.

ACHIEVEMENTS

- Winner: First Prize in multiple college symposiums for Paper/Project Presentation, Coding, and Quizzes.
- Runner-up: ICP-WCHL 25 by Internet Computer, recognized for AI-driven projects.

VOLUNTEERING

- Core Member: Event Manager, Google Developer Student Club : Coordinated technical events for 300+ students.
- Volunteer: Registration Committee, TEXPO'24 departmental symposium (managed 200+ entries).
- Organizer: Cybersecurity club BUG SQUASHERS (manages 100+ students).
